

QC Chemist

Centerbrook, CT

1st shift

Position Summary:

Chemist will work in our Quality Control Laboratory performing routine chemical testing of raw materials, in-process samples, and finished products in support of Tower Labs' manufacturing operation.

Responsibilities:

- Finished product testing both wet and dry sides.
- In-process and operations product and process testing, both wet and dry sides.
- Raw material testing.
- Stability and stress testing.
- Complete documentation and paperwork in a timely manner.
- Become fully trained and educated in cGMPs, GLPs, Safety, and Quality standards as it applies to functional performance, and as required to support business and operations.

Qualifications:

- Preferably 2 years lab bench experience in an industrial QC environment
- Experience with wet chemistry, AA, FTIR and HPLC preferred
- Good problem solving and analytical skills including decision analysis and implementation
 - Computer literacy with working knowledge of spreadsheets
 - Good math skills; familiarity with basic statistics
 - Strong attention to detail
 - Strong team player
- Good communication skills both verbally and in writing
- Degree in Chemistry or related science preferred

This medium sized company headquartered in Centerbrook, CT, offers a friendly, positive working environment with a competitive benefit package including 401(k) with discretionary company match. Tower Labs is a Socially Responsible Employer and a Great place to work!
