

Tower Laboratories, Ltd.

QC LAB CHEMIST

Centerbrook, CT

Tower Laboratories, a family-run pharmaceutical manufacturer in the effervescent business for over 40 years, is seeking a Laboratory Chemist on our off shift to assist in our busy QC Laboratory.

Tower Laboratories is the premier effervescent product manufacturer in the U.S. We develop and manufacture over-the-counter medications, prescription pharmaceuticals, dietary supplements, personal care, beverage and household products. The company has been expanding over the last few years and prospects for continued growth are excellent with several new and interesting products currently in the development stages right now. Please visit our website: www.towerlabs.com.

POSITION SUMMARY:

Perform all phases of chemical testing of raw materials, in-process samples, and finished products for full integration and support of Tower Laboratories' business and operations. Assist with various QC functions, such as conducting validation studies, development of analytical methodologies and techniques, creation of technical documents and various related projects.

ESSENTIAL FUNCTIONS:

1. Perform accurate chemical testing of raw materials, in-process samples, and finished products, including stability/stress testing, using instrumental analytical, wet chemical and physical analytical methods and techniques.
2. Document, review, evaluate and investigate analytical results, including the reporting and investigation of deviating results.
3. Report all observations and data in a timely manner, meeting specified deadlines.
4. Independently conduct validation studies and chemical and analytical/ QC work required to support them.
5. Participate in QC method development and improvement work as assigned.
6. Supportive product complaint chemical and analytical/ QC work as assigned.
7. Adhere to established validated methods and company procedures in performing all tests.
8. Adhere to cGMP, Good Laboratory Practices and other regulatory procedures.
9. Assist in the creation, review and approval of Tower's various QC and technical documents regarding SOPs, validations, operations and other QC/ R & D studies as required and requested.
10. Assist in the instruction and training of QC and other technical personnel as requested.
11. Conduct laboratory housecleaning and upkeep; assist in retain storage and distribution to promote a safe and orderly work area that customers will view as a representation of a quality operation.
12. Observe and practice all company safety procedures in performing duties.

ESSENTIAL SKILLS and EXPERIENCE:

- Minimum 2 years experience in chemical laboratory operations
- Good lab/analytical technique in support of chemical and manufacturing operations, familiarity with instrumental analytical and wet chemical techniques
- Familiarity with cGMPs and GLPs
- Knowledge of microbiological data interpretation
- Strong math skills; knowledge of intermediate statistics
- Strong problem solving and analytical skills including decision analysis and implementation
- Computer literacy, working knowledge of spreadsheets
- Ability to train and instruct other QC personnel (and others) as required.
- Strong ability to function as a team member; ability to communicate effectively with team members and other plant personnel, both verbally and in writing

EDUCATION:

Bachelor's degree in Chemistry with Lab specialization preferred.
Certification preferred - AQP and/or ASQC or equivalent, ACS

This medium sized company is headquartered in Centerbrook, Conn., and offers a friendly, dynamic working environment with a competitive benefit package including 401(k) with company match. *Tower Labs is a Socially Responsible employer and a great place to work!*
